The Lincoln County school census records are on Colorado State Archives microfilms L1560 (years 1931 District 1 – 1955 Joint 4, L1561 (years 1956 Joint 4 - 1939 District 32) and L1562 (years 1933 District 33 - 1964 District Re-31). Up through 1919 the annual report by the district secretary of children of school age residing in the district gives the date, district number, name, and sex. Beginning in 1916, they sometimes listed the parent or guardian and residence town. Beginning in 1920, added to the record was place and date of birth, school grade last attended of each child enumerated; names, address and nativity of parents; names and number of deaf, mutes, blind, illiterates and crippled; and totals. One-school frontier districts covered small geographic areas, likely formed based on walking to schools.

Lincoln County was formed from portions of Bent and Elbert counties in 1889 from a restructuring of Colorado counties. The county was named for President Abraham Lincoln. Hugo, named for a pioneer, Hugo Richards, was named county seat. The first railroad the Union Pacific, was built through Lincoln County, reaching Hugo July 6, 1870, and terminating in Denver later that year. Today, agriculture is the main driver of the Lincoln County economy, with 40 percent of the population engaged in either farming or agribusiness. Population in the county was 926 in 1900, reaching its peak in 1920 with 8,273. In 1960 the population stood at 5,310.

The first school in the area was Elbert County District #7 at Hugo, created in 1874. This district later was renamed Lincoln County District #1. The first four school districts were formed in 1889. Soon, a plethora of rural school districts had been created, as the lands were homesteaded, and the optimism of the earlier settlers and their hopes for the future were reflected in the names given to those one in schools ... names such as Sandhill, Lone Star, Columbine, Pleasant Valley, Green Valley, Pride of the Prairie, Lawn Ridge, Liberty Bell, Grand Meadow, and many others. At one time, school districts bore numbers as high as 46. Through consolidation, dissolution and annexations the school districts went through many changes and renumbering over the years, changing school district names and boundaries. Due to the School District Reorganization Act of 1957, in 1959 Lincoln County Schools were organized into five first-class districts. RE-1 at Hugo, Re-4 Joint at Limon, Re-13 at Genoa, Re-23 at Karval and Re-31 at Arriba. Gone were the one-room schools. Within another 30 years, that number was further reduced to three, as the Arriba School District consolidated with Flagler (in Kit Carson County) and Genoa School District consolidated with Hugo. Cowan, Colorado, was a Post Office in a Merchandise / Grocery store owned by the Cowan family in the early 1900s. (2) Forder was a locale near the Forder Ranch in southern Lincoln county. (3) Amy was a post office located in south central Lincoln county and no longer exists. The Amy Post Office was relocated numerous times to various homes but was abandoned about 1939. Tacony,

1915-1942, was a post office northeast of Boone, Colorado, although it appears on maps as early as 1885 in Pueblo County.

On the microfilm, the census is arranged chronologically by school district, then by year and alphabetically by the student's named within the record.

In the attached school census index, names and ages of the students are indexed with the years that the student attended a school. The names and spellings that were given on the census have been used for the transcriptions in the index. Variations of various day, month and year for birth dates are retained. Different people filling out the forms for different years with different handwriting resulted in variations in all the recorded data and interpretation of the instructions for taking the school census.

Instructions for taking the school census were as follows:

1. This census blank usually is for use in districts having a school population less than 100 persons.
2. Sections 97 and 115 of the School Laws Annotated, 1912, should be carefully consulted for *directions*. Usually the age on last birthday prior to April 10th should be given.
3. Place names of boys on left-hand page and those of girls on right-hand page in *alphabetical order*.
4. The names of all persons between the ages of six (6) and twenty-one (21) years should be given. In districts below first class, under residence, enter name of parent or guardian and post office address. Enter on separate list in back of the book each deaf mute or

blind child between the ages of four (4) and twenty-two (22) years, with *name and* post office address of each parent or guardian.

5. In calculating the numbers between 6 and 21, 8 and 14, the first number only in each case is to be included.

6. Students in a private or public institution, whose parents are not residences of the district in which such institution is located, should not be included in the census of that district.

7. This list must be taken, sworn to and filed with the County Superintendent on, or before the first day of June, of the current school year, or the district will forfeit its money for the ensuing year. The person taking the school census is directed to require each parent or guardian to subscribe or to take oath that such record is true and correct.

8. Crippled children up to the age of 21 years shall be included who have a physical deformity such as to restrict normal capacity for education or self-support. This includes all congenital deformities such as harelip, club feet, absence of some member, etc.; deformities caused by disease such as infantile paralysis, bone tuberculosis, etc.; or by accident such as fractures, burns which cause contractures, and the like. All children 6 years of age and under should be reported as early as possible to Colorado Child Welfare Bureau, Denver, Colorado.

The census record on these films may consist of these parts: student's name, date attended, district number, sex, place of birth (towns are in Colorado unless noted otherwise), birth date, usually age as of April 10th, residence and school grade last attended of each child enumerated, year of attendance census; parents or guardian names occasionally given, and country nativity of parents (after 1920) and whether illiterate; names and number of deaf, mutes, blind, illiterates and crippled. Some of the children had infantile paralysis which is an old synonym for polio, an inflammation of the central nervous system especially of the spinal cord and brain stem, resulting in muscle function disability. In some cases the last grade attended may be some years prior to the census year. The Census was taken about May of the census year. In some cases it appears the students continued to attend school even after having attended for twelve years which is reflected in the census as grade numbers larger than twelve. In some cases the girls got married, changed their surname, but continued to attend school. Beginning in 1941 there was a special school census list of unemployed, out of school youth between the ages of 14 and 21, which are noted as "unemployed" in the attached database.

In the case of information conflicts, one should always check the original records. Some of the records list the residence as "Ranch" which is not a town but indicates that they lived on a rural large farm. In some cases, the residence listed is the school name or a nearby creek and is not a town. It should be noted that only the most common residences specified were indexed in the attached database, and where residences are not specified one should check the original records which may have a residence specified. Some conflicts especially in birth dates and birth place appears in the records, and further study evaluating an age with a grade level or through other sources such as birth certificates, U.S. census and obituaries would be required to determine the correct birth date or birth place. Also in some cases divorces and remarriages has created confusion in the information recorded for the parents or guardians. The larger school districts appear

to have much more reliable birth information. SM in the record indicates stepmother, SF in the record indicates stepfather and GF in the record indicates grandfather..

Listed below is the following information: student's name, birth place, birth date (**only listed students born 1925 and earlier**), residence / Post Office (Joint districts included counties other than Lincoln), school district attended, parents or guardian (in isolated cases the parent or guardian for the census year may be deceased), age, attendance year and Archive film number. For the residence, state abbreviations were used, and Colorado towns have no Colorado state abbreviation. aka means "also known as". At the very top of the columns (the first first record in the database) on the right is the year of the census which begins with 1920 and ends with **1946 although later records are available** . An X in the column indicates that the student is reflected in the census for that year. Most of the records were handwritten, and it was hard to distinguish between the letters a & o , i & e, u & a, u & n, T & I, T & F, T & L and S & L, the numbers 2 & 3, 7 & 9, 4 & 9 and the names Lu and Lee. Some records were illegible and not indexed.
